

ALLIUM Acres

AGED GARLIC TINCTURE

THE MIGHTY BULB

Most of us have a memory of someone who would consume a raw clove of garlic and swear by its ability to ward off all manner of ailments. Well it turns out they were not crazy and Allicin is what makes it happen. Of the varieties we grow, we specifically selected the variety that has the highest Allicin content for our Aged Garlic Tincture.

BENEFITS

Historically, garlic was a common remedy for flus and colds. Garlic has antibacterial, antifungal, and antiviral properties. It is an antioxidant. It is also a prebiotic. Prebiotics feed the beneficial bacteria in your gut.

DOSAGE

Four or five drops once a day, in 4 oz of water or under your tongue.

SKILLFULLY CRAFTED

Allium Acres Aged Garlic Tincture contains only two ingredients, garlic and ethanol. It is processed by hand and aged a minimum of one year, with no chemical additives. The result is a pure, potent form of garlic. At approximately 40% alcohol by volume, the tincture is quickly absorbed by the body.

CONTRAINDICATIONS

Garlic tincture is not recommended for those on blood thinning medications or for those who suffer from anti-coagulating disorders. It is always best to check with your personal health care provider before taking any herbal medications, including garlic tincture.
